

Global Airbnb Analytics Dashboard

Dashboard Objective

-  **Analyze global Airbnb performance** by tracking listings, hosts, cities, and customer reviews
-  **Understand market distribution** across major cities and identify high-demand locations
-  **Monitor growth trends over time** to detect peak periods, declines, and external impacts like COVID-19
-  **Evaluate property type performance** (entire place, private room, shared room, hotel) and pricing trends
-  **Assess customer satisfaction** through ratings like accuracy, cleanliness, communication, and value
-  **Identify key business insights** to support pricing strategy, market expansion, and investment decisions
